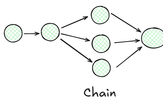
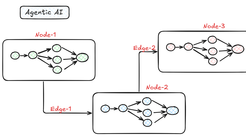
LANGGRAPH

Langchain is the go-to framework for AGENTIC AI solutions

AI AGENT



Agentic AI



What is LangGraph

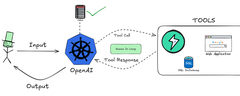
LangGraph is built on top of LangChain and is fully interoperable with LangChain. It's like adding more features on top of LangChain

The 2 major pillars of LangGraph are :

- Nodes & Edges
- Stateful Orchestration

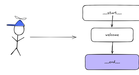
ReAct Agents

ReAct - Reasoning + Acting

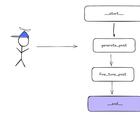


LangGraph Setup

First Graph



Pydantic Graph



In Langchain, the output of one node is the input of the next node but, in LangGraph, it's not the case
